SUMMARY

I am an ambitious and dedicated Computer Science enthusiast enrolled at the University of Westminster, actively pursuing opportunities to enhance my knowledge, skills, and experience. Committed to both personal and academic growth, I am eager to contribute my passion for learning and drive for excellence to a professional setting.

PROJECTS

Shopping Center GUI— Java/Java Swing

- Built a website that allows managers to add products according to the product details and users can see it through a GUI built using Java Swing.

Estate agent website — React, Bootstrap, HTML, CSS

- Developed a dynamic and responsive estate agent website using React for the front end, Bootstrap for sleek and mobile-friendly designs, and HTML/CSS to ensure a seamless user experience. Implemented intuitive navigation and engaging user interfaces to enhance property browsing.

Movie theater seat reservations system — Java

- Developed a Java-based movie theater management system that automates ticket reservations and showtime scheduling. This system has significantly improved the customer experience, making it easier to book tickets.

Open E-Library — Bootstrap, PHP, MySQL

- Built a website that allows users to find free e-books and also users can discover the free courses offered by universities .

Online Medical Donation Platform "PillarOfHope"

- As a valuable member of ongoing "PillarOfHope" project my role involves contributing to the development of the important features like prescription verification and front-end development.
